

From Clay McNally, a financial consultant with SFG:

On August 8, 2015, I participated in the Celebrate Local Festival held at TALMAR Gardens located in Cromwell Valley Park in Towson, MD. I have been assisting TALMAR Gardens and Horticultural Therapy Center in program funding and physical plant acquisition for 6 years.

Ms. Catherine Murphy, M. S. HTR executive director provides both educational and therapeutic programs for all ages and abilities for those with special needs or disabilities. The goal is to positively contribute to mind, body and spirit of the individuals they serve by improving their physical, psychological, recreational, educational and social well-being. The CSA programs with vegetables and flowers are the end result of the program participants. By working with wounded service men and women, children and local individuals, Cate's programs makes her program participants stronger and well versed in horticulture.

TALMAR Gardens and Cate Murphy have been featured in the Sun Papers, Towson Times, and the City Paper.

If you're looking for a way to volunteer/need service hours, to support your local community or to take a field trip to TALMAR's beautiful farm and greenhouse please visit <http://www.talmar.org/> or <http://www.localharvest.org/talmar-gardens-and-horticultural-center-M20589> for additional information.
